

90-1K-

### High voltage tester 90-1K with ramp function

- Test voltage 0 .. 2,500/5,000 VAC potential-free
- Tripping current 0 .. 100 mA
- Test time 1 .. 99s
- "Burn" operating mode

#### HV test

- Voltage loading
- Voltage not floating
- Test voltage (general): 0 .. 2.500 / 5.000 VAC
- Ramp function: 500 .. 1500 V/s
- Tripping current: 0 .. 100 mA
- Tripping current manually adjustable
- Test time: 1 .. 99 s
- Burn mode
- Output power: 500 VA
- Contact monitoring by reading the minimum current
- Suitable for high voltage test with item under operation (HV-Warm)

#### Display / Operation

- Separate digital instruments for test voltage and test current
- Test time setting via code buttons (decade)
- digital display 3 1/2 -digit

#### Interfaces

- digital-/ analog interface

#### Equipment data

## 90-1K-

- Mains voltage: 0 - 230 +10% -5% (49 .. 61 Hz)
  - Safety class: I
  - Slide in technique: 19"
  - Height : 4 HU
- 

### **Extensions / Options**

- Factory calibration certificate (optional)
- 

### **Order data**

- Order description: High-voltage tester
- Order number: 90-1K.3
