### **HIPOTRONICS**

# Motor Test Systems

Low & High Power AC/DC Motor Test Systems

HIPOTRONICS has been the leading manufacturer of complete AC and DC motor test systems since 1962. Our experience over the past 50+ years has enabled us to develop the most reliable and efficient test systems on the market. All of our manufacturing is done in-house to provide the highest level of quality. Our standardized design, patented Peschel Variable Transformer (PVT), and rugged motorized tap switches provide years of operation with minimal maintenance.

Our test sets include a 10 inch (25cm) color touch screen controller with intuitive menu functions. A standard digital tachometer and wattmeter allow for conveniently displayed measurements on the control interface, as well as temperature and power factor metering. Fast and easy test reports can be generated using data acquisition software on any computer.

We are a proud member of The Electrical Apparatus Service Association (EASA). EASA provides members with a means of keeping up to date on materials, equipment, and state-of-the-art technology.

#### FEATURES

- Measurement Devices included with all models:
  - o Digital Tachometer
  - Digital Wattmeter
  - Temperature Meter (Type E)
  - Power Factor Meter
  - Data Acquisition Software
- Emergency OFF switch and warning lamp for increased safety
- ☑ Control power circuit breaker
- Motorized tap selector switch decreases start up time
- Primary overload protection
- Digital voltage and current meters for accurate measurements
- Interlocked HV taps increase user safety
- ☑ Lifting provisions (crane and forklift)
- ☑ External Interlock provisions

#### BENEFITS

Variable transformer offers the most **stable output** available.

**Continuous variable voltage** from near zero to full voltage.

**Complete metering** to verify conditions of motor under test.

Decreased startup cost with minimal mains wiring required.

Motorized tap switch uses the **latest technology** to ensure reliable and accurate testing.

**Touch screen PLC controls** require minimal user training.

Patented PVT design allows for **smaller footprint** and **fewer moving parts.** 

Integrated safety and overload protection.

The model prefix MTC applies to systems with both AC & DC testing capabilities.
For Motor Test Systems with AC capabilities only, the DC specifications in the gray shaded area above are eliminated and model prefix changes to MTA.
Larger and smaller units may be available upon request.

4. Other input voltages may be available upon request.

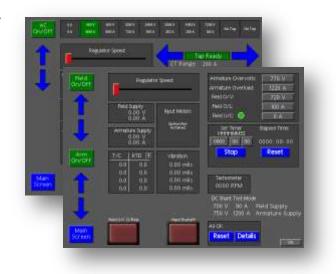

5. No-Load and Load calculations are approximate and may vary with each specific customer and application.

#### **OPTIONAL EQUIPMENT & ACCESSORIES**

- RTD Temperature Measurement Input
- Boom Arm Output
- Impedance supply
- Vibration Analyzer
- Additional Voltage Taps
- Optional Series Field Supply
- · Input Volt and Current Meters
