

Save up to €1,464 with a new SDS2000X Plus Oscilloscope and Option Bundle September 30, 2020

Designed to impress, the Siglent SDS2000X Plus oscilloscope has a feature-rich standard configuration and a suite of options that make it a powerful and flexible tool for all general-purpose tasks in the lab. Turn to the product page to get more detailed information on the SDS2000X Plus:

<https://www.siglenteu.com/digital-oscilloscopes/sds2000xp/>

For a limited time, all new SDS2000X Plus purchases include a free option bundle, including 4 high-performance serial decoding protocol options, function generator control, and the new power analysis functions.

SDS2000XP-IIS: Decode I2S digital audio signals

SDS2000XP -FlexRay: Analyze Serial Flexray encoded signals

SDS2000XP -1553B: Decode Mil-1553B serial communications

SDS2000XP -CANFD: Analyze CANFD serial signals

SDS2000XP -PA: Power Analysis activation license (Requires external DF2001A deskew fixture)

SDS2000XP -FG: Built-in 50 MHz arbitrary/function waveform generator

These options enable the user to conquer challenges with Automotive, Audio, Embedded and Power Electronics applications. Combined with the wide variety of all standard features, the SDS2000X Plus becomes one of the R&D and Test Engineer's most powerful tools.

Note:

1. The SDS2000X Plus series oscilloscopes must be purchased from an authorized SIGLENT distributor.
2. SIGLENT TECHNOLOGIES reserves the right to all final decisions related to this campaign.
3. Please feel free to contact us: info-eu@siglent.com.
4. All Offers are valid until March 31st, 2021.
